

MediRisk in short

- ‘Mutual insurance company’ for medical liability: “**nonprofit**”, members (hospitals) in charge
- MediRisk covers 41 Dutch general hospitals and is **one of the largest medical liability insurance companies** in The Netherlands
- **Leading in claimhandling** improvements (national code of conduct, process agreements with lawyers, “accountmanagement” in claimhandling)
- **Over 25 years of experience**; MediRisk has built a detailed claimdatabase with over 21.000 claims, which we use for analyses and medical risk management (MRM)
- Distinctive approach: **collaboration on patient safety**

Jointly alert on safety

Improving patient safety begins with gathering knowledge about the risks of unwanted outcomes of care.

Our database with over 21.000 claims provides us a great understanding of incidence rates, types, nature, preventability and impact of adverse events among hospitalized patients.

By actively exchanging knowledge with members, partners in the field and colleagues abroad, we're able to identify the risks more and more effectively and focus on new interventions to prevent claims.
